

# LACAVA

## TECHNOLOGY PRODUCT OF THE YEAR

### LACAVA: Zoom EX22

HONORABLE MENTION

The new social environment has created a new perspective at how we live and interact with objects used in daily activities. The *Zoom EX22* is touchless and automated fixtures for on-demand water delivery are right for the times. Electronic faucets and soap dispensers offer the most convenience and touch-free safety from spreading undesirable pathogens. Touchless features save water and promote environmental consciousness. The product design manifested in the flattened curve of the spout responds to a modern aesthetic with clean lines.
