CIGNO # 1583S.4

The new model of Cigno deck-mount three-hole faucet with squared-gooseneck swiveling spout and two lever handles features smooth 90-degree curves and concealed cartridge housings. The aesthetic result of the carefully balanced proportions on the slim spout, and yet slimmer handles implanted into thin circular base rings, is such that the fixture evokes a sense of rigid harmony and order while still depicting softness and classic qualities.
