ELEGANZA ELE-W-16, paired with a softly curving white porcelain sink, is a wall-mount compact vanity designed specifically with small bathroom quarters in mind. The standard version features one left-hinged door with two attached shelves and fingerpull opening. A right-hinged option is available upon request. The vanity represents an incredible ingenuity for optimizing storage while providing clean and minimalistic aesthetics and stretching the material flexibility to its full potential. It is proudly handmade of woods from renewable forests by master-craftsmen in the USA and offered in a wide array of stained and painted finishes with and optional under-cabinet LED accent lighting. The sink, shown with a single faucet hole, is also available with 2 and 3 faucet holes for other faucet configurations. With this vanity, limited space no longer requires sacrificing the style.
